- ◆ Pre-Calculus
- ◆ Advanced Research
- ◆ Probability & Statistics
- ◆ Discrete Mathematics
- ◆ Research

ABOUT HOSTOS STEP Proyecto Access is a year-round program originally funded in 1996 by NASA (The National Aeronautics and Space Administration) at Hostos Community College. The main objective is to increase the number of minority graduates in STEM majors. Currently, the Program is sponsored by the New York State Education Department, serving 282 high achieving underrepresented/economically disadvantaged secondary school students with the potential to become engineers or scientists. The Program offers enrichment courses to middle and high school students in science, technology, engineering and mathematics. In addition, students work on different engineering projects, including the Tower, Bridge, Robotics and Astronomy Projects with a potential to participate in the Annual STEP Statewide Student Conference.
